ABOUT ME

Full-Stack Developer skilled in the MERN stack and passionate about building responsive, real-world web apps. I've also worked on AI/ML projects involving data preprocessing, model training, and deployment. Always eager to learn, build, and solve problems through code.

EDUCATION

B.TECH (CSE)

Amity University Mumbai
2022 - 2026

SKILLS

- MERN Stack Development
- Flask Web Applications
- Machine Learning
- UI/UX Basics
- Git & GitHub

PROGRAMMING LANGUAGES

- JavaScript
- Python
- SQL
- Flutter/ Dart
- C/ C++

PROFESSIONAL EXPERIENCE

June 2025 – July 2025

Web Development Intern

Tamizhan Skills

- Developed and deployed 8+ web apps using React and TailwindCSS
- Hosted projects on Vercel with focus on performance and responsive UI
- Built a full-stack MERN application with CRUD operations
- Notable Projects: LucidResume, DevNexarAI, ShopEZ, Estudiantify

April 2025 – May 2025

Machine Learning Intern

Acmegrade

- Applied core machine learning concepts to real-world classification and recommendation projects
- Built a cancer prediction model using classification algorithms
- Developed a movie recommendation system based on user preferences
- Worked on data preprocessing, model training, evaluation, and hyperparameter tuning
- Tech Stack: Python, NumPy, pandas, scikit-learn, Matplotlib

💼 PERSONAL PROJECTS

Car Price Prediction — GitHub
- ML web app predicting used car prices from brand, year, fuel type using Flask and regression models. Clean, interactive UI.

Medimapster — GitHub
- Medicine and pharmacy locator using Flask backend, React frontend, and geolocation APIs for emergency medicine access.

ScanWay — GitHub
- Predicts road PCI% using CatBoost, XGBoost, and OpenCV for smart city road quality monitoring, with React and TailwindCSS for frontend

Student Information Management System — GitHub
- Flask and MySQL based system managing student data, attendance, grades, with admin and student roles.

Vyavsaayi Sahayak — GitHub
- Web app for small businesses to handle inventory, sales, and customer records built with Flask and MySQL.

Eato - Food Delivery App — GitHub
- Flutter app with food ordering, cart, and order history features using Firebase backend.
